Disposable Tableware
Crafted from Renewable Plant Fibers
Compostable*

*In a commercial composting facility.

Tellus uses the power of plants to tackle disposable plastic waste.

**Crafted from
renewable
plant fibers**

**Compostable—
breaks down in
less than 3 months
in a commercial
composting facility**

No PFAS added

Proudly made in the USA with U.S. and imported plant fibers, Tellus products are thoughtfully crafted with care and precision. Our plant-based compostable tableware helps reduce reliance on fossil fuels and waste into landfills.

**Manufactured
in Belle Glade
Florida, USA**

INNOVATION

Tellus is helping to reshape the foodservice packaging landscape. How? We transform renewable plant fibers into disposable tableware through creative design and advanced manufacturing technology. All of our plant fiber-based products are produced at our SQF level 2 certified manufacturing facility in Belle Glade, Florida. Tellus compostable products illustrate the positive impact that packaging can have on our environment, and we are continually expanding our offerings to meet the evolving needs of our customers.

SUSTAINABILITY

At Tellus, we take pride in our commitment to sustainable packaging solutions. How are they sustainable? Instead of using non-renewable fossil fuels like many plastics, our products are made from renewable plant fibers. They hold out grease and water without the addition of PFAS chemicals that do not break down in the environment. Many of our products can be returned to the earth after use - the Tellus Classic line composts within 3 months in a commercial composting facility and is both BPI and CMAA certified. And our commitment to sustainability doesn't stop at our products, it extends to our office building, which is LEED Silver Certified and uses power from a solar panel array located on top of the Tellus plant.

JOIN US IN OUR MISSION

Let's work together to provide diners with food packaging solutions that help reduce waste going into landfills.

Our Product Lines

Our product lines include Tellus Classic, our original range of compostable tableware crafted from renewable plant fibers, and Tellus Elite, our latest offering that includes a surface coating providing superior resistance to oil and grease across various applications.

Features	Tellus Classic	Tellus Elite
Made from Renewable Plant Fibers	✓	✓
No PFAS Added	✓	✓
Oil & Grease Resistance	Good	Superior
Hot & Cold Food Friendly	✓	✓
Compostable	✓	
BPI & CMA Certified	✓	
Microwave Safe	✓	✓
Freezer Safe	✓	✓
Ovenable		✓

NO PFAS ADDED

Our products hold out grease and water without having to add in PFAS chemicals, otherwise known as “forever chemicals” that do not break down in the environment.

PUT A LID ON IT

Tellus sources flat and domed plastic lids that have a minimum of 50% recycled PET and are #1 PETE recyclable. The lids are completely transparent and seal tight to lock in freshness and flavor—excellent for takeout, delivery and room service.

At Tellus, our products **come from the earth and are returned to the earth...**
We just borrow them for a short time.
